

## **MOBILE PREPARATION UNITS**

Mobile preparation units for liquid solutions.

Injectable and oral solutions, syrups, lavages, etc.

Range: from 10 litres to 300-350 litres

CIP and SIP can be connected to plant utilities.

Mixing from above or below with magnetic drive guarantees cleanliness, sterility and reduced maintenance

Our preparation systems can be equipped with:

- Electrical resistors for heating the product
- Vacuum pumps
- Loading cells
- Heating liquid recirculation pump
- Lid lifting system

## **PREPARATION SYSTEMS**

Preparation and storage systems for batches of liquid solutions.

Injectable and oral solutions, syrups, lavages, etc.

Range: from 500 litres to 3,000 litres

CIP and SIP can be connected to plant utilities.

Mixing from above or below with magnetic drive guarantees cleanliness, sterility and reduced maintenance

Our preparation systems can be equipped with:

- Electrical resistors for heating the product
- Vacuum pumps
- Loading cells
- Heating liquid recirculation pump
- Transfer pump

## PREPARATION SYSTEMS

Homologation in conformity with Directive 97/23/EC (PED) and complete with all necessary documentation for IQ and OQ certifications

Homologation pressure  
-1+6 in the body  
-1+3 in the jacket

Upon request and pending approval, FAT and SAT documents may be issued

Semi-automatic control and command panel

Optionals:

- Automatic process parameter management via PLC
- Recipe (work programme) management
- Thermoregulation management
- Recording and printing
- Touch screen operator panel
