

# Introducing... **The Super SIVTEK®**

A high capacity & high efficiency Separator that can even sieve down to 400 mesh without blocking

Suitable for Powders  
or Liquids

**Triple** your output without increasing the size of your machine

## Very high throughput rates

- # Provides up to 3 times higher process rates compared to conventional separators.

## Low running cost

- # Reduces floor space requirements.
- # Lower manpower & maintenance costs.
- # Higher throughput per unit mesh area.
- # Provides up to five separations in a single operation to give maximum capacity.

## User friendly

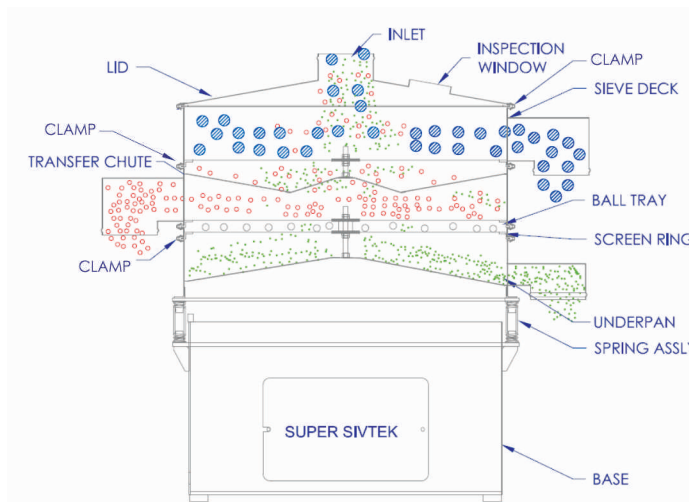

- # Very easy to operate
- # Automatic discharge of material
- # Quick change clamping mechanism
- # Available with clean in place systems
- # Quick mesh change system

## Efficient fine mesh sieving

- # Able to sieve up to 400 # with comparable efficiency to Ultrasonics in most applications.
- # Accurate grading of different size particles

ISO 9001 : 2008

**The Super SIVTEK®** is a unique high efficiency separator. This machine can provide up to 3 times higher throughput compared to standard vibro separators.

This is made possible by developing a unique design that generates higher vibrations and out of balance forces by the use of heavy duty motion generator.

Three standard sizes 40"(1000mm), 48"(1200mm) & 60"(1500mm) to meet your screening & separation needs. (Other Models available on request)

### Capacity Enhancer:

#### # SIVTEK Maximizer® Deck

The Maximizer Deck can be retrofitted to existing machines or supplied on new machines to further improve production capacity by over 50 %. It is suitable for most types of sieving and separation applications and can help to rejuvenate your existing machines.

Always ask for authentic Galaxy Sivtek after market parts to keep your machines running to maximise your production.

### Proven Screening and Grading technology

# Over 20 years of experience of solving customer problems are at your disposal to ensure the Sivtek Separators deliver the highest standards of operating performance and reliability.

#### Established Industry Applications

Paper	Ceramics	Sugar
Food	Minerals	Chemicals

And many more...

Visit our website [www.galaxysivtek.com](http://www.galaxysivtek.com) to find out how the Super SIVTEK can assist in overcoming your screening and separation problems to maximise the performance of your plant.
