

ROTEX is the global leader in screening technologies, engineering and manufacturing leading-edge equipment for screening & separation, feeding & conveying.

ROTEX machines offer a unique design with horizontal gyratory motion for high capacity performance. Your profit: increased performance and productivity, leading to more revenue.

Our innovative product line includes:

## ROTEX® screener

- The original Rotex screening machine, bringing authenticity and 100 years of improvement
- Effective screen mesh cleaning
- Screen areas up to 12 m<sup>2</sup>
- Up to 5 decks models
- Allows high rates with high efficiency

## APEX™ screener

- Side access to screen mesh panels
- Screen frame/Ball tray weighs less than 20 kg
- Ergonomic design, it can be easily maintained by one person; increased productivity
- Easy maintenance and cleaning; easy access to outlets; less downtime
- Modular panels-interchangeable between machines increasing the benefit

## MEGATEX XD™ screener

- Compact footprint for increased screening area
- Up to 3 deck and 30m<sup>2</sup> area per deck
- External drive for continuous operation up to 200°C, easy maintenance and less downtime

## PLASTIC PELLET screener

- Compact design, dedicated to plastic pellets
- Easy access and operation, lower maintenance for higher productivity
- Double pass option for increased screening accuracy

## ROTEX - more than 160 years of innovation around the world

Rotex history is a long story about passion for screening and dedicated care to our customers. In a few points...

1844 – Isaac Straub founded the future ROTEX Company.

1913 – Rotex screener, the original machine is created

1950 – Rotex screener is introduced in Europe via Thomas Locker (Belgium) and Locker Process Solutions (UK)

2001 – Rotex Europe was founded with the purchase of the sales activities of Locker by Rotex Inc.

Today ROTEX Global continues its tradition of innovation into the 21st century. Combining modern facilities and state-of-the-art techniques to assure continuing adherence to quality and reliability.
