

SHRINK WRAP MACHINES

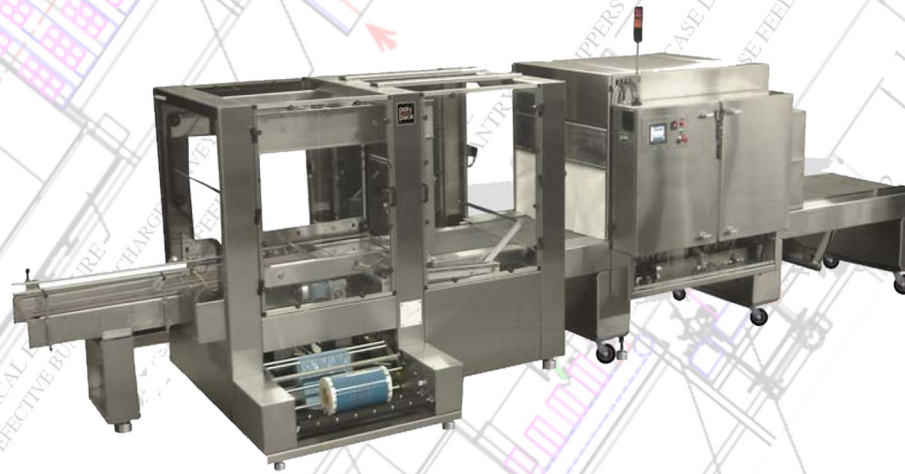

SHRINKING YOUR PACKAGING COSTS

Shrink wrapping saves money by cutting down on costly consumables. With Polypack, you can decrease or even completely eliminate the use of traditional packing materials like corrugate. This dramatic decrease in waste results in an overall lower capital investment.

With 50 years of experience, Polypack, Inc. has become a leader in manufacturing packaging equipment. Polypack's shrink packaging equipment and tray wrappers are built with the best materials and components including stainless steel to offer an increased service life, superior performance, durability, and reliability.

Polypack, Inc. leads the packaging industry, manufacturing total closure and sleeve wrap machines using clear or print registered film, fully automatic tray loaders/formers, label orientation and robotic pick and place equipment.

INNOVATIVE SHRINK PACKAGING EQUIPMENT

With over 50 years of experience, Polypack, Inc. has become a leader in manufacturing packaging equipment. Polypack's shrink packaging equipment and tray wrappers are built with the best materials and components including stainless steel to offer an increased service life, superior performance, durability, and reliability.

TANGO SERIES

Compact, versatile shrink wrapper designed for both clear and printed film. The TANGO uses interchangeable infeeds with fast changeovers. Multi-purpose bundler for both retail and distribution packs. Wraps up to 20 bundles per minute.

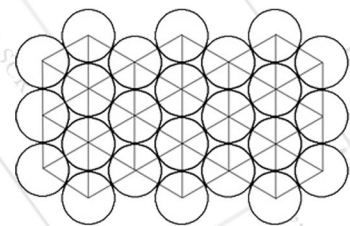

CLEARPRINT SERIES

CLEARPRINT machines produce bulls-eye wraps using either clear or print registered film. These machines operate at speeds up to 60 wraps per minute single lane and up to 120 per minute in dual lane.

CLEARPRINT SERIES

NESTED PACKS™ & HANDLEWRAP™

Polypack offers unique shrink packaging solutions that offer unique marketing opportunities and appeal to consumer sensibilities. Nested configurations and integrated carry handles can drastically cut down on corrugate while offering eye-catching yet practical features.
