Harwix Building, 7 Ha'Arad St.
Ramat Ha'Chayal, Tel Aviv 6971060,
Israel

Liranco Foreign Trade Ltd. was founded in 1986 by Ran Liver. Liranco acts as importer and distributor of industrial process equipment and spare parts, mainly to the Mineral, Food, Chemical, Pharmaceutical, Biotechnological, Electrical and Communication industries, representing manufacturers from England, Germany, Italy, Spain and The United States. It also provides communications solutions, technical support and training.

Liranco is the Sole Agent and Representative of manufacturers from Europe and The United States, and imports quality equipment characterized by the most innovative technology. Since its establishment Liranco has substantially increased the number of its suppliers and extended its range of products, while its marketing methods ensure the accumulation and enrichment of experience in all areas of trade and engineering.

Liranco's professional team of marketing, sales and technical support engineering has proved its ability to identify customer requirements and to meet them by offering the highest level of industrial solutions and engineering service.

CASE STUDY

Vered Hagalil

Vered Hagalil, of Unilever Group, (Corporation, Conglomerate) work with us through their (Chief) Engineer, Mr. Moshe Siboni.

The plant produces a range of sweets (sweetmeats, confectionery, and candies) and a large variety of chocolates. They have embarked on an efficiency-enhancement programme, involving changes in the main production lines, which in turn demand varied solutions for conveyance problems, and adaptation of existing machinery to the new requirements.

LM's solution, implemented by Liranco, was to replace the existing 180° conveyer by two 90° conveyers linked by a straight

section. The resultant changes in the overall length and breadth of the **whole conveyer system created** a user-friendly floor-space easily navigable for necessary access, and well-suited to maintenance and cleaning requirements.

In order to meet a very stringent deadline we had to slash delivery time by a coordinated engineering effort, the end-product of which consisted of two standard angle-conveyers linked by an adjustable straight section facilitating compensation for measurement errors and minor corrections of up to 100mm in either direction using only a simple screwdriver.

This enabled us to implement on-site assembly with confidence and achieve a well-integrated and smoothly-working system.

We have here a concrete example of streamlining procedures from the initial idea to final implementation, with Liranco an active partner **throughout, in collaboration with our client and to their full satisfaction.**

Liranco Foreign Trade Ltd.

A list of the leading manufacturers in this field

1. **C.L.A s.r.l.**, Italy
www.claschio.it
 Agitator vessels and heating system, Bin blender, reactors, CIP systems, lifting columns.

2. **Nuova Guseo s.r.l.**, Italy
www.nuovaguseo.eu
 Grinding, mixing and solids handling, hammer and cone mill, micronizer

3. **Comi Condor S.p.a**, Italy
www.comicondor.com
 Peeler centrifuge, Inverting Filter centrifuge , Bottom and top discharge Centrifuge.

4. **Emde Industrie-Technik GmbH**, Germany
www.emde.de
 Bucket elevators, flexible screw conveyor, pneumatic conveyor, big bag emptying stations and filling stations, dust suction systems, Rotary valves Mixing- single screw, continuous and double paddle, lump breaker.

5. **Optima International Ltd.**, England
www.optima-international.co.uk
 Wedge wire screens, centrifuge baskets, sampling equipment for solids and powders, waste water treatment.

6. **Agierre S.a.s.**, Italy
www.agierre.eu
 Vacuum transfer system for powders and grains, mobile lifting column for drums and big bags, bin blender column, pharma bin.

7. **LM S.p.A**, Italy
www.lmgroupp.it
 Separators, dividers, continuous platform elevator multilane dividers, belt curves, accumulators.

8. **Rotex Europe Limited**, England
www.rotex.com
 Screening machines for dry separation from size analysis to conveying, screening and separating. Screening machine combines Gyrotory Reciprocating Motion, Minerals separator, Plastic Pellet Screener, Drive Feeder & Conveyor.

9. **Minox Siebtechnik GmbH**, Germany
www.minox-siebtechnik.de
 Rotating screens, separator systems, vibrating feeders.

10. **Galaxy Sivtek Pvt. Ltd.**, India
www.galaxysivtek.com
 Round separator, vibrating screening, vibrating separator.

11. **Optima consumer GmbH**, Germany
www.optima-consumer.com
 Packing equipment, full filling and packing lines.

13. **Arodo BVBA**, Belgium
www.arodo.com
 Form, fill and seal (FFS) machinery, vacuum packing, palletizers, stretch hood machines.

14. **Arca Etichette Spa**, Italy
www.arca.it
 Labeling and printing machines for labels, barcodes etc.

14. **Chitra Machineries Pvt. Ltd**, India
www.chitramachineries.com
 Filling and capping machine, elevating de-duster, tablet coating, cartoner machine.

15. **Polaris s.r.l.**, Italy
www.polarisengineering.com
 VOC treatment, cryogenic condensation systems, cryogenic distillation systems, steam & nitrogen generators, solvents recovery plant for liquids and waste water.

16. **Stroter Antriebstechnik GmbH**, Germany
www.stroeter.com
 Motors gear.

17. **Newsmith Stainless Limited**, England
www.newsmiths.co.uk
 Washing and drying systems for bins, pallets, and other machinery parts.

18. **Wire Belt Company Ltd.**, England
www.wirebelt.com
 Special conveying and woven belts.

19. **Adams LubeTech Ltd.**, England
www.adamslube.com
 Oiling and greasing systems.

20. **Heavy duty chains for conveyors and bucket elevator.**
